Subsidiary of **ELSEWEDY ELECTRIC**

Product Range and Applications

Egyptian Company for Plastic Industry ELSEWEDY EGYPLAST was established in 1996 as a subsidiary of ELSEWEDY ELECTRIC.

At EGYPLAST we create polymers compounding and processing for a sustainable future. We combine economic success with environmental protection and social responsibility. The approximately 700 employees work on contributing to the success of our customers in various sectors locally and worldwide. Our portfolio is organized into five segments: PVC Compound, Masterbatch, Special Compounds, PP Fibers and Fiberglass Poles.

EGYPLAST considered as one of the largest Manufacturers of Plastic Compounds in the Middle East and Africa, With high dedications to PVC Compound, Special Cable Compounds and Masterbatch, for various applications with annual production capacity 120000 Tons.

In 2015 the Company acquired Two Factories to add new products to its range; the first is the Fiberglass Poles Factory, which was established in 1998 by German Technology, equipped with two production lines of annual production capacity of 24000 Poles, Covering Street lighting, Decorative & landscape applications. And the Second is PP Fibers factory, which was established in 1998 by German Technology, equipped with three production lines and annual production capacity reaches 17000 tons covering the industrial applications.

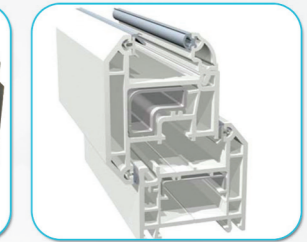

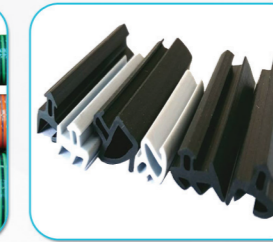

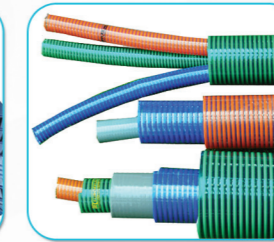

EGYPLAST is ISO 9001, ISO 14001 and OH SAS 18001 certified, supplying materials according to RoHS and REACH regulations, state of the art facilities in our production units and modern laboratories assures high quality control levels, providing unique ability to offer specialized compounds tailored to customer's specific needs in compliance with the international standards of quality, safety, environmental regulations.

PVC Compound :

- Soft PVC Compound

For (Cables and Wires, Footwear, Hoses, Gaskets, Seals, Water Stops, Tools and Curtains)

- Rigid PVC Compound / Granules.

For (Windows and Doors Profiles, Ceiling and Ducting Profiles, Pipes and Fittings)

Masterbatch;

- White Masterbatch - Black Masterbatch

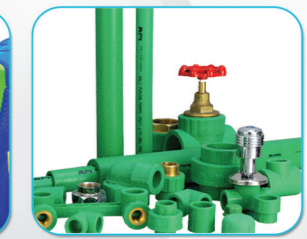

- Color Masterbatch - Filler Masterbatch

- Special Effect Masterbatch

(Metallic, Pearlescent, Florescent and Glitter)

- Functional Additive Masterbatch

(Processing Aid MB / Antistatic MB / Anti-Block MB / Anti-Microbial MB / UV MB / Infra-Red MB / Anti-Oxidant MB / Slipping MB)

Special Compounds:

- XLPE Compound for Low Voltage Cables

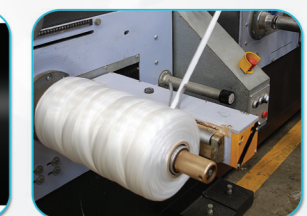

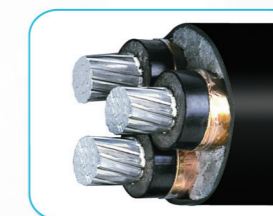

- HFFR/LS0H Compound for Cables

- PE Black Jacket for Cables

PP Fibers:

- PP Filling Yarn for Multi-Core Cables

Fiberglass Poles:

- Street Lighting Poles

- Decorative Lighting Poles

- Flood Lighting Poles

- Solar Lighting Poles

- Over Head Power Transmission Poles

- Signals & Flags Carrier Poles
